06 R&D & Partnership
Customization & contact

20+ Years of Manufacturing Expertise

Founded in 2007 as an export-focused packaging company, Gaocho spent years building deep market knowledge serving overseas beauty brands.

Today our 9,000 m² facility runs 30+ fully automated production lines with 5,000+ available molds, producing 100,000+ units daily. We hold multiple patents and industry certifications, reflecting our ongoing commitment to innovation in packaging design and manufacturing technology.

In 2016 we integrated trading with manufacturing quality control, and by 2020 we had established our own in-house factory in Jintian Industrial Park, Huadu District, Guangzhou — giving us full control over quality, lead time, and production execution.

2007 FOUNDATION
Started as an export-focused packaging company, building overseas market understanding and strong client relationships with beauty brands worldwide.

2016 DEVELOPMENT
Moved toward a trading-manufacturing model, strengthening control over quality, production execution, and supply chain reliability.

2020 IN-HOUSE FACTORY
In-House Factory: Established our own production facility in Guangzhou — full vertical integration from mold development through finished goods.

2025-2035 FUTURE VISION
Scaling production capacity and deepening long-term partnerships — co-creating the future of sustainable, innovative cosmetic packaging.

One integrated *operation*

Design, moulding, printing, assembly and quality control — every stage owned in-house across a single 9,000 m² base in Guangzhou.

Facility, people & *tooling*

Design to dispatch, *in-house*

Because design, tooling, moulding, decoration, assembly and inspection all run on our own floor, every hand-off is controlled in-house — protecting quality and compressing lead time.
